The ELEVATE Pull-up™ utilizes incline bodyweight resistance to assist users in doing a proper pull-up to strengthen the muscles of the upper body. Built on an adjustable incline with seven levels to select from, the ELEVATE Pull-up allows users to lift approximately 30 percent to 60 percent of their own bodyweight.

1. Designed to successfully allow anyone to perform pull-ups using their own bodyweight.
2. Strengthens all the muscles of the upper body.
3. Seven incline levels allow users to progress from pulling as little as 30 percent of their own bodyweight up to 60 percent.
4. Enhanced functional performance of daily activities and increased athleticism.
5. Exercises can be progressed or regressed to accommodate all fitness levels.
