

The **OFFICIAL**  
**TRAINING BIKE** of

Le  
de **TOUR**  
france

# Le de TOUR FRANCE

With the official Tour de France® Training Bike you get the experience of riding outside without leaving the comfort of your own home.

You draw the route – anywhere in the world – and iFit Live™ Technology Powered by Google Maps™ automatically downloads the map to your console. What you see is exactly what you feel – every hill, every flat and every decline.

## IT DOES WHAT THE **STREET** DOES

Introducing incline and decline that matches the street! Now, you can experience any route around the world and Le Tour de France Indoor Cycle automatically adjusts the incline and decline to simulate the terrain! No matter the route, no matter the map, your bike moves to follow the road.

## RIDE **ANYWHERE** IN THE WORLD WITH **GOOGLE MAPS™** **iFIT LIVE TECHNOLOGY™**

With the iFit Live™ Technology Powered by Google Maps™ you can ride anywhere in the world! Choose from 24 pre-mapped courses or create your own. Ride over the Passage du Gois or climb the hills of Mont des Alouettes in France. Now you can experience these same trails and more on this Indoor Cycle.

## INTELLIGENT WIND RESISTANCE FOR A MORE PERSONALIZED EXPERIENCE

---

Intelligent Wind Resistance automatically adjusts the resistance of your bike based on your wind profile. Our smart technology calculates your height and weight to apply the natural resistance you would get out on the road. A climb in your basement is exactly like a climb outside.

---

## WHAT THE PROS ARE SAYING

---

"The "Tour De France Trainer" is incredible because it has a very realistic road feel. In over 20 years of riding trainers, I've never ridden anything even close. My favorite features are the Google Maps iPhone application, and that the bike actually rotates up or down based on uphill and downhill. The "Tour De France Trainer" is by far the closest stationary bicycle to the road I've ever experienced! Five stars!"
